EDUCATION

CareerFoundry - Full-Stack Web Development

- Built a portfolio website from scratch using; Trello, GitHub, HTML, and CSS
- Developed a Pokémon App with HTML, CSS, JavaScript, and bootstrap that loads data from an external API and enables the viewing of data points in details
- Built the server-side component of a “movies” web application with Node.js, Express, MongoDB and Heroku
- Built the client-side for an application called myFlix based on its existing server-side code (REST API and database). Tools: React, React Redux, Bootstrap
- Built a serverless, progressive web application (PWA) with React using a test-driven development (TDD) technique. The application uses the Google Calendar API to fetch upcoming events.
- Built a chat app for mobile devices using React Native, Gifted chats and Google Firebase. The app provides users with a chat interface and options to share images and their location.
- Used Angular and Material Design to build the client-side for the myFlix App based on its existing server-side code (REST API and database).

Technische Hochschule Georg Agricola

- Masters Mineral Resource engineering
